THE GENEVA HEALTH FORUM

An essential gathering for global health

Created in 2006, the Geneva Health Forum (GHF) takes place every two years, in the spring, a few weeks before the World Health Assembly.

The GHF is organised by the Geneva University Hospitals (HUG) and the University of Geneva (UNIGE) in partnership with the principal international health organisations in Geneva.

The GHF defines itself as the forum for innovative practices in global health. It addresses, using an integrated and global approach, the main issues affecting access to care and stimulates discussions on the major health challenges of the day.

Since its inception, the GHF has evolved around four main drivers:

- Establishing a critical and constructive dialogue amongst global health actors from diverse sectors, including organisations responsible for public policy, scientists, field practitioners and the private sector.
- Listening to personal accounts of field workers so that these experiences can inform the development of health policy.
- Paying special attention to lower and middle-income countries (LMIC) and humanitarian contexts.
- Drawing on the dynamism of Geneva’s role as an international hub in the field of health.

The GHF allows participants to:

- Discover innovative practices
- Give visibility to their activities and to promote these amongst key global health actors
- Discuss major issues in global health
- Facilitate meetings and networking
- Initiate new collaborations

For each edition of the GHF a theme is chosen to provide a common thread to the proceedings.

Over twelve years the GHF has become one of the major events in global health, bringing together renowned academics, medical doctors and care providers, political leaders, diplomats, representatives of funding agencies and other actors active in health care provision. The age-old tradition of Swiss neutrality facilitates critical and respectful exchanges between health actors who might not normally meet.

The themes covered over the seven editions are:

Geneva, the international capital for global health and humanitarian action

Geneva is today recognised as the international health capital. Home of the World Health Organisation headquarters, Geneva also hosts numerous governmental and non-governmental organisations active in the public health sector.

Each year in May, the World Health Assembly brings together the health ministries of the 194 member states to discuss the main health issues facing the international community and to set the future agenda for the WHO.

The network of health attachés in permanent missions to the United Nations is a further component of this dynamic environment.

The Lake Léman region, often referred to as the “Health Valley”, is home to a unique concentration of health establishments, academic institutions and major companies active in the health sector, along with a flurry of innovative biotech, medtech and engineering start-ups.

Geneva is also the international humanitarian capital. Since the creation of the International Committee of the Red Cross (ICRC) in 1860 and the signing of the Geneva Conventions in 1949, it is from Geneva that assistance to victims of conflicts and natural disasters is coordinated.

Henry Dunant, creator of the ICRC

Home to the Office of the UN High Commissioner for Human Rights, the International Organisation for Migration, the Human Rights Council and as host to the main NGOs active in this domain, Geneva is a key location for the promotion and protection of human rights and humanitarian action.

Geneva Conventions of 1949

WHO Headquarters
The main organisations and international global health actors present in Geneva are partners of the Geneva Health Forum.

Theme: Precision Global Health in the Digital Age

Objective: to explore the impact of digital tools on public health practices and examine whether the digital revolution currently underway supports the development of more precise and efficient health interventions (Precision Global Health)

Strategic priorities

Definition of the strategic priorities for this edition of the GHF:
• Reinforce relations with organisations present in Geneva and active in global health
• Reinforce the role of the GHF as a discussion platform by proposing activities that foster collaboration and networking
• Receive a guest of honour (Russia) and two special guests (Kirghizistan and Tajikistan)

Carry-forward several strategic drivers defined during previous editions:
• Reinforce the presence of the French-speaking world
• Address questions of gender both in the organisation of the GHF as well as in the debates
• Engage with paramedical and non-medical actors intervening in the health sector
• Facilitate the attendance of actors from countries with limited resources

Governance

The Steering Committee is the executive arm of the GHF. In this capacity it:
• takes decisions concerning the organisation of the GHF
• chairs the Programme Committee
• supervises the work of the operational team
• represents the GHF
• takes responsibility for the financial and logistical management of the GHF

The Steering Committee is composed of representatives from the HUG and UNIGE.

The Programme Committee is the scientific arm of the GHF. In this capacity it:
• advises the Steering Committee on the orientations of the GHF,
• proposes a list of participants,
• proposes the topics for discussion,
• shares its opinion regarding the components of the programme

The Programme Committee is composed of representatives of the partners and co-opted experts.

As for the Operational team, it:
• implements the decisions of the Steering Committee
• represents the GHF when delegated by the Steering Committee
• ensures the technical organisation of the GHF

The communication service of the HUG takes responsibility for the coordination of the communications of the GHF. To this end, the service works in close collaboration with the respective communication units of UNIGE and the WHO.

Activities organised during the 2018 edition of the GHF

The GHF takes place in the International Conference Centre Geneva (CICG) over three days, from Tuesday to Thursday, a few weeks before the World Health Assembly.

**Official Ceremonies**
The Conference is officially introduced and concluded during the opening and closing ceremonies.

Keynote addresses during the opening ceremony:
- Manuel Sager, Ambassador and Director-General of the Swiss Agency for Development and Cooperation of the Federal Department of Foreign Affairs.
- Dr Naoko Yamamoto, Assistant Director-General of WHO, representing Dr Tedros Adhanom Ghebreyesus, Director-General of WHO.
- Dr Oleg Salagay, Vice-Minister of Health of the Russian Federation.

View the opening ceremony:
http://ghf2018.g2hp.net/sessions/opening-ceremony

Keynote addresses during the closing ceremony
- Jürg Utzinger, Director of the Swiss Tropical and Public Health Institute.
- Peter Maurer, President of the International Committee of the Red Cross (ICRC).

View the closing ceremony:
http://ghf2018.g2hp.net/sessions/closing-ceremony

**Plenary sessions**
Four renowned speakers debate issues of the day in five plenary sessions of ninety minutes each.

Plenary sessions were designed by SDC, MSF, the Geneva Centre for Emerging Viral Diseases, the M8 Alliance and the World Health Summit. The last plenary session took place under the pretext of the “Nursing Now” campaign.

The Sli.do system allows the audience to pose questions to the speakers via their mobile phones. Tested for the first time during this edition, the user response was positive.

**Plenary session, tutorial of the GHF**
Two twenty minute sessions devoted to two complex notions relevant to the theme of the conference:
- blockchain for global health, by Jean-Pierre Hubaux
- the importance of artificial intelligence for global health, by Paul Lukowicz

View the plenary sessions:
http://ghf2018.g2hp.net/plenary
Parallel sessions
24 parallel sessions of 90 minutes each devoted to 5 major themes: the health system, health care, health actors, research and development, and communication.

Sessions were structured as "short presentations / round table / questions and answers with the audience". These sessions allow for a discussion of technical issues raised by the presentations of field experiences.

View the parallel sessions:
http://ghf2018.g2hp.net/parallel-session

ScienceFlashTalk
The ScienceFlashTalk, a friendly competition organised by the Swiss School of Public Health, highlights the investigations of young researchers who present their work in three minute Speed Talks.
Six Swiss researchers took part in a first round. A second round saw three students of the Sechenov University of Moscow present their work.

View the ScienceFlashTalk:
http://ghf2018.g2hp.net/scienceflashtalk

Workshops
The workshops brought together a working group around a specific question over the course of three to four video conferences during the four months preceding the GHF. The results of the workshops were presented to the public on Wednesday 11 April.
Twelve workshops involved one hundred and thirty one participants.
Aside from discussing the subject matter, these workshops allow people working in similar fields to meet and exchange.
Five of the workshops plan to publish a white book on their proceedings.

View the workshops:
http://ghf2018.g2hp.net/workshop

Experience sharing sessions
(Breakfast sessions)
Thirteen experience sharing round tables brought together between ten and fifteen people with practical experience relevant to the subject matter. These sessions are open to the public with audience participation possible towards the end of each session.

These breakfast round-tables were very well attended and proved effective as vehicles for bringing together people working on similar issues.

View the experience sharing sessions:
http://ghf2018.g2hp.net/experience-sharing

Brocher Conference Series
A historical reminder of the anniversaries of two important events in the history of public health by two speakers invited with the assistance of the Brocher Foundation:
• the 70th anniversary of the WHO and the 40th anniversary of the Alma Ata declaration, by Patrick Zylberman
• the 1918 Spanish flu pandemic, by Jones Esyllt

Useful reminders that give a historical perspective to the deliberations of the GHF.

View the Brocher Conference Series:
http://ghf2018.g2hp.net/brocher-conference-series
**Lunch session**

Sessions for some fifty participants hosted by GHF sponsors, who address a theme of their choosing in a friendly and active atmosphere, while a buffet lunch is served.

Two parallel sessions are organised each day, from 12:30 to 2pm.

This formula, appreciated both by sponsors and participants, favours direct exchanges between the speakers and the audience.

View the Lunch sessions: http://ghf2018.g2hp.net/lunch-session

**VIP Lunch Dialogues**

VIP Lunch Dialogues bring together fourteen guests each day around a different theme: cooperation with Russia, cyber security, and International Geneva.

These meetings are an occasion for high-level exchanges between actors involved in similar issues.

The VIP lunches were greatly appreciated by participants.

**Global Health Lab**

The Global Health Lab presented one hundred and five innovations in what amounted to an innovations exhibition that was highly appreciated by participants. The Lab is a key component of the GHF, showcasing innovations that can be used sustainably in countries with limited resources.

View the Global Health Lab: http://ghf2018.g2hp.net/global-health-lab

**Posters**

Presentation of 138 scientific posters showcasing scientific research or global health projects, with a section particularly focused on posters presented by Masters or PhD students.

The concept of e-posters, used for the first time, promotes on-line posters and facilitates archiving. Furthermore, the absence of printed posters represents a financial saving for presents and a reduced ecological footprint for the conference.

View the posters: http://ghf2018.g2hp.net/poster-en-image

View the Young researchers posters: http://ghf2018.g2hp.net/poster-young-reseacher-with-pictures

**Stands**

Twenty-six stands allowing the participants to meet and exchange with partners, sponsors or other exhibitors.

View the stands: http://ghf2018.g2hp.net/stand

**Side-events**

Seven side-events hosted by organisations collaborating with the GHF during the second evening of the conference.

Side-events are much appreciated by collaborators as they provide visibility to certain GHF related entities and facilitate networking.

View the side-events: http://ghf2018.g2hp.net/side-events

**Signing sessions**

Six book signing sessions organised for the respective authors participating in the GHF.

View the signing sessions: http://ghf2018.g2hp.net/signature
GHF Prizes
The Jets d’or for young researchers rewarded two scientific posters:

- Nadya Wells: “Four Challenges that Global Health Networks Face” Shiffman Framework to contrast access to medicines challenges for NCDs and NTDs: Insulin versus Praziquantel
- Yu Zhao: OpenWHO: Integrating online knowledge transfer into health emergency response

The Innovation Jet d’or showcases an innovation of the Global Health Lab: Kusy Baby, a Wearable mHealth Solution for Maternal and Child Health at the Last Mile

The Grand Jet d’or of Geneva distinguishes Professor Marcel Tanner, President of the Swiss Academy of Sciences and former Director of the Swiss Tropical and Public Health Institute, for his work and his involvement in the field of global health.

The GHF prizes are financed by the private HUG foundation.

View the Jets d’Or of Geneva: http://ghf2018.g2hp.net/jets-dor-de-geneve

Anne Maurer Cecchini Prize and the Jet d’or of the GHF
Awarding of six prizes during the GHF.

View the prizes of the Anne Maurer Cecchini Foundation: http://ghf2018.g2hp.net/award-anne-maurer-cecchini

Prize of the Anne Maurer Cecchini Foundation
For the fourth time, two prizes were awarded during the GHF:

- Hector H. Garcia et al, of Lima, Peru, for their article entitled “Elimination of Taenia solium Transmission in Northern Peru”
- Victor Kande Betu Ku Mesu et al, for their remarkable randomised clinical trials entitled: “Oral fexinidazole for late-stage African Trypanosoma brucei gambiense trypanosomiasis: a pivotal multicentre, randomised, non-inferiority trial”.

Hosted meetings
Organising of five meetings by organisations taking advantage of the logistical capacities and mobilisation power of the GHF. These meetings are reflective of the GHF’s desire to foster and facilitate networking.

View the Hosted meeting: http://ghf2018.g2hp.net/hosted-meeting

Hackathons
Wishing to promote science that is open and participatory, the GHF gives visibility to two hackathons organised in Geneva during April 2018:

- proclamation of the results of the CERN Medtech: Hack 2018 by Charlotte Lindberg Warakaulle, Director of International Relations at CERN, during the opening ceremony.
- during the GHF closing ceremony, public announcement of the holding of the Open Geneva Hackathon 2018, organised for the weekend following the GHF.

A friendly atmosphere
The GHF is recognised for its friendly atmosphere that permeates the hospitality shown and the character of the debates. This friendly atmosphere was also fostered through the presence of the cartoonist Pecub whose drawings enlivened the Global Health Lab for the duration of the GHF.

Musical moments during both the official ceremonies and plenary sessions added flavour to the proceedings of the GHF.

Finally, four photo displays addressing subjects not covered in other activities of the GHF added diversity to the events on offer.

View Pecub: http://ghf2018.g2hp.net/pecub-au-ghf

#### During the GHF 2018 we will be hosting three photo exhibitions:

- "A few steps from the edge of life" by Sophie Brigh
- "Les images de la victoire" by Nadja Zizzo
- "A view of the world" by Vanessa Badi

To view these exhibitions, be sure to visit the "Photo exhibitions" section of the GHF 2018 website.

### Source:
The GHF was made possible by the support of the following organisations:

**SPONSORS AND DONORS**

**Principal sponsors**

**Associates**
- Fondation Brocher
- cartong
- GHL
- The Pori
- Nursing now
- Swiss-Russian Forum
- HES·SO
- Planète Santé
- SK Slovácko

Specific collaboration
- World Economic Forum

Committed to improving the state of the world.
PARTICIPATION

One thousand four hundred people attended the GHF in 2018, up from one thousand two hundred in 2016 and seven hundred and fifty in 2014. Participants came from eighty-four countries, principally from Western Europe (79%). The other continents were evenly represented.

12% of participants came from LMIC.

Russia, the guest of honour, mobilised its global health actors and constituted the third largest delegation after Switzerland and France.

Nine hundred and six active participants were counted during the GHF. Participation was greatest in the Global Health Lab (one hundred and eighty-eight), followed by the posters (one hundred and thirty-eight), the workshops (one hundred and thirty-one), the parallel sessions (one hundred and twenty-four) and the experience exchange sessions (one hundred and five).

Eighty-six participants, in their majority from LMICs, received a grant to finance their attendance at the GHF.

CONTRIBUTIONS

The GHF received three hundred and eighty-eight abstracts from sixty-five countries. This figure is similar to that for previous editions (four hundred and seventy in 2016 and three hundred and fifty-nine in 2014).

45% of the proposals were retained, for a total of one hundred and seventy-four.

Of the one hundred and seventy-four proposals retained:

- 77% were for a poster (one hundred and thirty-four)
- 16% for an oral presentation (twenty-seven)
- 4% for the Global Health Lab (eight)
- 3% for an experience sharing session (five).
A significant communications effort was undertaken by the HUG Communications service, including the production of:

- Visitor cards
- 6 page sponsoring brochure
- A3 notices
- Invitations to the opening and closing ceremonies
- Badges
- Advertisements in lay press
- Programmes
- Banners

Media relations were carried out through close coordination between the communications services of the HUG, the WHO and the UNIGE.

The communications services of GHF partners also contributed to the success of this edition.

The GHF has developed its own means of communication:

- website (http://ghf2018.org)
- newsletter
- Twitter account (https://twitter.com/Genevaforum)
- blog (http://blog.ghf2020.org)

Videos are available on the YouTube channel: https://www.youtube.com/user/genevahealthforum

Finally, a mobile application was developed for the 2018 edition:

PARTICIPANTS SATISFACTION SURVEY

An online questionnaire was open to all participants from 13 April (the day after the closing of the conference) to 23 April 2018.

The questionnaire had forty-eight questions covering six themes:
- characterisation of respondents
- general evaluation of the GHF
- evaluation of the sessions
- evaluation of the other activities
- evaluation of the logistics
- gathering ideas for future editions

23% of the participants registered at the GHF responded to the invitation to fill the questionnaire, a sizeable proportion for this type of survey.

Below are some of the principal results of the survey.

The results reflect overall satisfaction on the part of the respondents, which is consistent with other comments received by mail or in person.

Overall evaluation of the GHF

87% of respondents had a good or very good overall opinion of GHF 2018.

72.5% of respondents thought that the theme of the meeting was well covered.

81.4% of respondents judged the content as good or very good.

81.8% of respondents were satisfied with the quality of the speakers.

82.9% of respondents were satisfied with the quality of the information provided.

Respondents particularly benefitted from their attendance at the GHF by gathering information (81.1%), making new contacts (84.4%) A smaller portion shared their projects or ideas (71.0%).

High levels of satisfaction were expressed for general logistics (84.0%), registration (92.6%), the web site (79.9%), coffee breaks (76.0%) and the venue (91.0%).

Evaluation of the main sessions

74.4% of respondents rated the quality of the plenary sessions as good or very good.

75.2% of respondents rated the quality of the parallel sessions as good or very good.

64.6% of respondents rated the quality of the workshops as good or very good.

83% of respondents rated the quality of the experience sharing sessions as good or very good.
Other lessons

The on-site communications and social media put in place by the GHF proved to be the most effective in attracting potential participants. Retaining participants from one edition to another is a challenge and an effort to keep potential participants informed between GHF editions is indispensable.

Logistics and registration were appreciated. The CICG seems to be a popular venue.

Certainly more could be done with respect to the materials distributed in the conference bag and the mobile application.

Official ceremonies should be more dynamic.

Efforts to improve poster visibility need to be continued.

Gathering ideas for future editions

Respondents offered many ideas. Amongst these, the most common were:

- Maintain the USB key with key documents of the GHF
- Improve signage for getting to and from the meeting rooms
- Diminish the number of sessions and avoid having two sessions running in parallel
- Devote more time and activities to networking

Among the innovative ideas, we note:
- Organise a forum of the participants during the GHF

Respondents proposed numerous ideas for themes for the next GHF. Amongst these, we often find:

- Health and climate change
- Access to health, universal health coverage
- Equity and care
- Impact of projects in the field
PERSPECTIVES 2020

Participants
Increase the number of participants (1'800 people) in order to optimise GHF dynamics.

To achieve this objective we could:
• Maintain activity involving contact with potential participants (via the blog, Twitter, the newsletter, the internet site).
• Develop promotional activities in advance of the GHF
• Increase our network of partners and collaborating organisations
• Work with universities

Maintain engagement with the International organisations of Geneva, the WHO and the permanent missions.

Continue efforts to increase participation of actors from countries with limited resources,

Maintain an attractive pricing policy.

Governance
Pursue engagement with International organisations in Geneva by welcoming new partners.

Contributions
Promote the call for contributions in universities and in countries with limited resources.

Presence between two GHFs
Between two editions, use the dynamism and network of the GHF to organize Expert Meetings (update on the vaccine against human papillomavirus infections, diabetes care in Africa ...) and participate in public events (Salon Planète Santé ...)

Programme

<table>
<thead>
<tr>
<th>Programme</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Framework</td>
<td>Replicate the overall format of the GHF. Promote networking activities. Propose to use the Monday before the GHF to organise the hosted meetings.</td>
</tr>
<tr>
<td>Official ceremonies</td>
<td>Make the official ceremonies shorter and more dynamic.</td>
</tr>
<tr>
<td>Plenary sessions</td>
<td>Enhance the attractiveness of plenary sessions with news-relevant subjects.</td>
</tr>
<tr>
<td>Parallel sessions</td>
<td>Diversify participant engagement formats to make the GHF more dynamic (seminars, tutorials). Should we not reserve a space for networking sessions (quick presentation of projects, foundations...)?</td>
</tr>
<tr>
<td>Lunch Sessions</td>
<td>Renew Lunch sessions in their current format.</td>
</tr>
<tr>
<td>Global Health Lab, Demonstration space</td>
<td>Replicate space for demonstration of innovations. Propose animations to facilitate exchange between the innovations presented.</td>
</tr>
<tr>
<td>Posters</td>
<td>Explore the potential of the e-posters.</td>
</tr>
<tr>
<td>Stands</td>
<td>Increase the number of stands.</td>
</tr>
<tr>
<td>Side-events</td>
<td>Renew the side events organised by partners.</td>
</tr>
<tr>
<td>Prix jet d’or de Genève</td>
<td>Promote the GHF prizes.</td>
</tr>
<tr>
<td>Other activities</td>
<td>Renew the workshops, the experience exchange sessions and the VIP Lunch dialogues.</td>
</tr>

</table>
Assessment of strategic priorities

International Geneva
Enhance our linkages with the International Geneva organisations.

Networking
Increase networking activities.
Reach out to foundations and startups seeking new partnerships.
Make an effort in the direction of universities.

Guest of Honour
Renew the idea of a country as guest of honour.
Reserve the special guest slot not for a country but for a network of actors.

French speaking world
Reinforce translations into French of the GHF sessions and documents.
Beyond the question of translations, reach out to the French speaking world.

Gender
Maintain our objective of gender equity amongst the speakers.

Paramedics
Maintain our objective of opening up to the paramedical professions.

Media and communication

Internet site
Choose a conference organisation software that includes among other elements a mobile application.

GHF promotion campaign
Well in advance of the GHF, develop a campaign to promote the GHF and to increase our influence as well as attendance.

Coordination HUG / UNIGE
A meeting between the communications services of HUG and UNIGE should be organised in October 2018.

International media
Enhance outreach to international and medical media.
Initiate collaborations with international and medical media.

Communications material
Be sure to prepare communication materials sufficiently in advance to approach partners and potential sponsors.
Increase media presence during the GHF.
Set up a proper pressroom open to journalists; facilitate the organisation of press conferences, broadcast messages from the GHF.
Broadcast GHF sessions live or delayed.
GHF 2020: KEY DATES

24-26 March 2020
CICG Geneva
http://ghf2020.org

**Thema:** Improving access to health: learning from the field

**Special Guests:**
International Council of Nurses (ICN)
International Alliance of Patients’ Organizations (IAPO)
